

Virtual Collaboration group on Respiratory Drug Development:

A proposal for comment

Idea/Question: is it possible to create a virtual collaboration between industry and academic experts in the area of Respiratory Drug Development?

Areas of work:

- Bioequivalence
- 510(k) approval
- Device technology
- Clinical aspects (study design, endpoints, key pitfalls)
 - o Asthma, COPD, Cystic Fibrosis, IPF
- Industry trends
- Venture Capital trends
- Scientific progress and news

Key goal:

- everybody should benefit more than they contribute
- advance the field by collaborating online or in a virtual working group

So:

- Who is interested? Why/why not?

My promise: I will gather the feedback, and report back via mail
